FICTIONAL DEMO RESUME — NO REAL APPLICANT

Jordan Example

Early-career software engineering student

PROFILE

Software engineering student interested in dependable web applications, accessible interfaces, and clear technical documentation. This fictional profile is created only to demonstrate the SkillProofAI workflow.

EDUCATION

Bachelor of Software Engineering — Sample University (fictional)
Expected graduation: 2026

SELECTED PROJECTS

Evidence Portfolio Tracker

- Developed a React dashboard to organize project evidence and role requirements.
- Built a Python FastAPI REST API backed by a SQLite database.
- Wrote automated pytest checks for 18 API cases and improved request validation.
- Used Git branches and peer review to coordinate project changes.
- Participated in weekly Agile planning and recorded technical decisions.
- Team planning discussions covered Docker, cloud deployment, release checklists, operational monitoring, scaling tradeoffs, platform access, version compatibility, and maintenance.

Accessibility Notes Mini-site

- Created a responsive React interface with keyboard navigation and readable contrast.
- Tested form validation and documented follow-up improvements.

SKILLS USED IN PROJECTS

Python, React, FastAPI, REST APIs, SQL, SQLite, Git, pytest, Agile teamwork, HTML, CSS.
